This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. REPORT

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,
Washington, D. C., November 1, 1907.

SIR: I have the honor to make report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1907, accompanied also with a statement of the receipts from the several sources of internal revenue for the months of July, August, and September of the current fiscal year.

RECEIPTS.

The receipts of this Bureau for the past fiscal year were $269,664,022.85, being an excess of $20,561,284.85 over the collections for the preceding year.

The receipts for the first three months of the current year show an increase in collections of $2,872,037.93, as compared with the same months of the past fiscal year, and, based upon this increase, it is estimated that the total receipts for the fiscal year ending June 30, 1908, will aggregate $278,000,000.

The objects of internal-revenue taxation producing the largest amount of revenue are distilled spirits, fermented liquors, and tobacco.

During the past fiscal year there was collected on distilled spirits $149,749,338.63; on fermented liquors, $58,546,110.69; on tobacco, $51,811,069.69.

RECEIPTS IN LARGE TAX-PAYING STATES AND DISTRICTS.

The leading States in the payment of internal-revenue taxes for the past year are Illinois, $54,856,141.97; New York, $32,353,647.70; Indiana, $29,675,182.10; Kentucky, $28,444,138.38; Pennsylvania, $22,727,998.26; Ohio, $21,834,068.60.

Among the States paying the smallest amounts are Idaho, Maine, Mississippi, Nevada, New Mexico, North Dakota, Vermont, and Wyoming.

Of the 66 collection districts in the territory of the United States subject to internal-revenue laws the Fifth district of Illinois reported the largest collections—$35,577,448.10.

In 1906 the total production of distilled spirits was 150,110,197 gallons; in 1907, 174,712,218. In 1906, in round numbers, 124,500,000 gallons of tax-paid spirits were withdrawn; in 1907, 136,100,000. There has been an increase in the amount of tobacco and snuff manufactured and in the production of beer.

The four States having the largest production of distilled spirits during the past fiscal year are Illinois, 48,273,128 gallons; Kentucky, 38,301,247 gallons; Indiana, 26,873,413 gallons; Ohio, 12,625,801 gallons. The two collection districts having the largest output of distilled spirits are the Fifth district of Illinois, 38,129,229 gallons, and the Fifth district of Kentucky, 18,148,956 gallons.

The four States which made the largest quantity of fermented liquor are New York, 13,018,902 barrels; Pennsylvania, 7,541,796 barrels; Illinois, 5,423,328 barrels; Wisconsin, 5,026,322 barrels. The two districts which produced the largest quantity of fermented liquor are the Third district of New York, 5,119,588 barrels, and the First district of Illinois, 4,570,238 barrels.

The four States producing the greatest number of cigars weighing more than 3 pounds per thousand, and the production of each during the year, are as follows:

Pennsylvania	1,923,575,754
New York	1,453,317,020
Ohio	682,944,846
New Jersey	470,842,704

The two districts showing the largest production of cigars are the Ninth Pennsylvania, 795,248,267, and Third New York, 723,866,912.

The States showing the greatest production of little cigars (weighing less than 3 pounds per thousand) are:

Virginia	468,472,760
Maryland	327,392,488
New York	124,307,690

The greatest production by districts is as follows:

Maryland	327,392,488
Sixth Virginia	261,180,280
Second Virginia	207,292,480
Second New York	58,922,570

The States of New York, Virginia, Louisiana, North Carolina, Pennsylvania, and California, in the order named, show the greatest production of cigarettes weighing less than 3 pounds per thousand.

New York produced	2,738,574,955
Virginia produced	1,104,201,630
Louisiana produced	389,368,890
North Carolina produced	109,660,000
Pennsylvania produced	79,475,160
California produced	28,998,658

The two districts showing the greatest production of little cigarettes are the Second New York, which produced 1,609,801,830, and the Third New York, which produced 1,074,238,625.

New York State produced the greatest number of large cigarettes, showing a production of 10,127,954; of which number 6,026,804 were manufactured in the Third district and 4,097,650 in the Second district.

The States of Missouri, North Carolina, Kentucky, Ohio, and Virginia, in the order named, were the largest producers of both chewing and smoking tobacco, the quantity produced being as follows:

	Pounds.
Missouri	72,048,808
North Carolina	63,440,723
Kentucky	52,342,943
Ohio	32,971,012
Virginia	28,625,393

The First Missouri district produced the largest quantity, the returns showing the manufacture of 71,779,095 pounds during the year, the next largest being the Fifth Kentucky, which produced 47,451,316 pounds.

COST OF COLLECTING THE INTERNAL REVENUES.

The cost of collecting the internal revenues for the past fiscal year was 1.81 per cent, which is a reduction of cost as compared with the last fiscal year, when the percentage was 1.90.

The average cost since the creation of the Bureau is 2.74 per cent.

DENATURED ALCOHOL.

Under the provisions of the act of June 7, 1906, which took effect January 1, 1907, domestic alcohol of the required proof may be withdrawn from bond, free of tax, on application of any registered distiller, for use in the arts and industries, and for fuel, light, and power, when rendered unfit for use as a beverage or for liquid medicinal purposes, by the admixture of suitable denaturing material in a denaturing bonded warehouse specially designated or set apart for that purpose.

The privilege so conferred is limited to alcohol withdrawn from distillery warehouses and denatured on the distillery premises. Provision, however, is made in the act for the redenaturation and reuse of alcohol recovered by manufacturers during any manufacturing process; and, by a supplemental act, approved March 2, 1907, which went into effect September 1, 1907, provision is also made for the establishment of central denaturing bonded warehouses; for the transfer thereto from distillery warehouses of alcohol in packages, tanks, or tank cars; for the substitution of cisterns or tanks for bonded warehouses at distilleries producing alcohol from any substance whatever for denaturation only, and having a daily spirit producing capacity of not exceeding 100 proof gallons; and for the exemption of such distilleries from such other provisions of existing law relating to distilleries as the Commissioner of Internal Revenue and the Secretary of the Treasury may deem expedient.

The amendatory act also authorizes the use of denatured alcohol in the manufacture of ether or chloroform and other definite chemical substances, where the alcohol so used is changed into some other chemical substance; also the denaturation of rum of not less than 150° proof; the establishment of storage tanks in distillery bonded warehouses, for alcohol (or rum) intended for denaturation, and the transfer therefrom, or from distillery receiving cisterns, of alcohol by pipes directly to the distillery denaturing bonded warehouse.

Regulations governing the manufacture, sale, and use of denatured alcohol, under the act of June 7, 1906, were duly issued, and the same have been revised and supplemented with such further provisions as were made necessary by the amendatory act of March 2, 1907. In many respects these regulations are similar to those in force in England and Germany, where denatured alcohol may be used free of tax; and a brief synopsis of the same is hereto appended.

Under these regulations two classes of denatured alcohol may be used.

(1) *Completely denatured alcohol* which may be used for domestic or mechanical purposes, including fuel, light or power, or for manufacturing purposes not prohibited. For this class of alcohol the following denaturants have been prescribed:

(*a*) To every 100 gallons of ethyl alcohol (of not less than 180° proof) 10 gallons of approved methyl (wood) alcohol and one-half gallon of approved benzine.

(*b*) To every 100 gallons of ethyl alcohol 2 gallons of approved methyl alcohol and one-half gallon of approved pyridin bases.

(2) *Specially denatured alcohol.*—This class of spirits is permitted to be used for manufacturing purposes only, where completely denatured alcohol is not suitable for the use intended. Alcohol prepared with special denaturants has thus far been authorized for use in the manufacture of the following named articles:

(*a*) Shellac varnish, photographic dry plates, embalming fluid, heliotropin, lacquers from soluble cotton, resin of podophyllum, and similar products, manufacture of thermometer and barometer tubes.
(*b*) Celluloid, pyralin, and similar products.
(*c*) Transparent soap.
(*d*) Smoking and chewing tobacco.
(*e*) Photo-engravings.
(*f*) Fulminate of mercury.
(*g*) Watches.

ALCOHOL WITHDRAWN FOR DENATURATION.

During the six months ended June 30, 1907, there were withdrawn from bonded warehouse for denaturation 3,084,950.8 taxable (proof) gallons of alcohol, or at the rate of 6,169,901.6 gallons annually; or approximately the quantity (7,367,594 gallons) which from reports received from collectors in 1882 it was then estimated would be used annually for industrial purposes if exempt from tax. (Report of Commissioner of Internal Revenue, 1882, pp. CXXVII–VIII.)

The estimate then made, however, included alcohol used in liquid medicinal preparations, which at that time represented a large per-

centage of that used for manufacturing purposes. At that time, also, comparatively little wood alcohol was produced. But, owing to the high rate of tax imposed on ethyl alcohol (which in 1894 was raised from 90 cents to $1.10 per proof gallon), the use of wood alcohol rapidly increased, and at the time of the passage of the act of 1906 had to a large extent supplanted that of grain alcohol for industrial purposes. According to information obtained by the Committee on Ways and Means, pending the consideration of the denatured alcohol bill, the quantity of wood alcohol produced in the United States during the year 1905, exclusive of that exported, was about 6,000,000 gallons, and the price of producing the crude alcohol is stated in the committee's report as 40 cents per gallon, or nearly double the cost (20.5 cents per gallon[a]) of denatured alcohol to which 10 per cent of wood alcohol had been added, as estimated by the committee. (House Report 2888, 59th Cong., 1st sess., pp. 3–5.)

After the passage of the act of June, 1906, however, the market price of refined wood alcohol was reduced from 70 cents per gallon (in December, 1906) to about 40 cents per gallon (in January, 1907), the then selling price of denatured spirits. Notwithstanding this large reduction in price it would appear that this class of alcohol has been in turn displaced to a large extent by denatured alcohol.

That little, if any, loss of revenue has thus far resulted from the use of industrial alcohol free of tax appears from the fact that the quantity of alcohol withdrawn from warehouses on *payment of tax* during the last fiscal year exceeded like withdrawals during any previous fiscal year since 1894.

The expenses incident to the administration of this law have also been materially less than anticipated at the time the act of June 7, 1906, was enacted. Of the $250,000 appropriated by that act there were expended during the six months ended June 30, 1907, $43,266.76 only, which amount covers salaries and expenses of inspectors, deputy collectors, storekeepers, gaugers, traveling expenses, office force, laboratory supplies, locks, etc.

MANUFACTURE, SALE, AND USE OF DENATURED ALCOHOL.

As already noted, *specially* denatured alcohol can be obtained and used only by manufacturers and for certain authorized purposes.

Of the 382,415.19 wine gallons of this class of spirits denatured during the six months ended June 30, 1907, there were shipped directly from denaturing warehouses to 130 manufacturers holding permits, 375,276.94 wine gallons, and of the 332,499.61 gallons used during that period for manufacturing purposes, 56,887.20 gallons were recovered for reuse. Of the 1,397,861.16 wine gallons of *completely* denatured alcohol produced (which class of spirits may be obtained by manufacturers, dealers, and others and used for any lawful purpose) there were likewise shipped during the same period 1,355,763.19 wine gallons, as follows:

	Gallons.
To manufacturers (777 in number)	181,759.28
To wholesale dealers (784 in number)	1,149,029.24
To retail dealers (7,038 in number)	7,057.83
To persons other than registered dealers or manufacturers	17,916.84

[a] Computed on the average price of corn (42.36 cents per bushel) for ten years.

Manufacturers using this class of spirits, unless recovering the same for reuse, are not required to render returns of the quantity received or used by them, and in many instances alcohol used for manufacturing purposes is obtained from wholesale dealers, who, in some instances also obtain their stock of denatured alcohol from other wholesale dealers. For the reasons here stated, no accurate statistics as to the final disposition and use of this class of spirits can be furnished. On comparing the various reports received, however, it appears that of the 1,149,029.24 wine gallons shipped directly from denaturing warehouses to wholesale dealers, 577,715.26 wine gallons were sold by such dealers to manufacturers and to persons other than retail dealers. This quantity added to that shipped directly from warehouse to manufacturers and "others" totals 777,391.38 wine gallons, which it is believed closely approximates the quantity of completely denatured alcohol used for manufacturing purposes during the period stated.

As shown by the tabulated statement under the heading "Assessment Division," the quantity of denatured alcohol received by retail dealers during the period referred to, including that shipped directly from denaturing warehouses, was 295,670.19 gallons only. This quantity, which was used mainly, if not wholly, for domestic purposes, averages about 42 gallons to each of the 7,038 registered dealers, or, based on the estimated present population of the United States, less than .004 gallon per capita. From reports received it appears that a large proportion of these dealers are retail druggists; but the total number of such dealers is less than 20 per cent of the number of retail druggists in business in the United States, as shown by the last census.

Except in the matter of obtaining permit, and properly labeling the denatured alcohol sold, no restrictions are imposed on such dealers, provided alcoholic liquors are not drunk on the premises where such denatured alcohol is sold or stored. No restriction whatever is placed on persons purchasing industrial alcohol, either in retail quantities or in original packages for general use, such as light, heat, power, or for mechanical purposes, and the present limited use of such alcohol for these purposes can hardly be attributed either to stringent laws or regulations.

On examination of such reports as are now available, it is found that the quantity of methylated (denatured) alcohol produced in the United Kingdom of Great Britain during the fiscal year ended March 31, 1906, was 5,663,429 imperial proof gallons (equivalent to about 6,800,000 proof gallons United States standard) or about the estimated quantity now being used in the United States. The quantity of absolute alcohol produced in Germany for industrial purposes during the fiscal year ended October 1, 1904, was 1,394,607 hectoliters (equivalent to about 37,000,000 United States wine gallons), 10,000,000 gallons of which are reported as having been used for manufacturing purposes and 27,000,000 gallons for light, heat, and power.

While the quantity so reported used for manufacturing purposes far exceeds that now being used in this country for like purposes, a yet more noticeable difference appears as to the quantity entering into general use.

PROBABLE CAUSE OF LIMITED USE OF ALCOHOL IN THIS COUNTRY.

While possessing fewer heat units, denatured alcohol, being less inflammable and disagreeable in odor, is far preferable to either gasoline or kerosene for heating, lighting, or power; and the fact that it is not now being extensively used in this country for these purposes is doubtless due (1) to the relatively greater cost of production and (2) to the lack of proper appliances for its use.

As understood by this Office, various types of alcohol lamps, heaters, and motors are in successful use in Germany, and to encourage the manufacture and use of industrial alcohol the Government of Germany not only "offers inducements" to growers of potatoes, from which the alcohol is manufactured, but imposes an import duty on petroleum and petroleum products.

It also appears that under this system there are some 70,000 farm distilleries in Germany producing industrial alcohol, and that the alcohol so produced is sold to consumers at about 27 cents per gallon. The number of distilleries in this country producing alcohol for industrial purposes has so far not exceeded ten; and the average price of denatured alcohol in barrel lots has been about 36 cents per gallon. To encourage the establishment of industrial distilleries the most liberal regulations, consistent with the safety of the revenue, have been prescribed; but up to the present time no distilleries of this class have been registered.

No large number of these industrial distilleries seems probable under existing conditions. While these distilleries are now permitted to use any material whatever in the production of industrial alcohol, the alcohol so far manufactured has been produced mainly from corn; and, until a cheaper distilling material is found and its practical use demonstrated, it may be doubted whether this class of alcohol can successfully compete with gasoline or kerosene in this country. Unlike ordinary proof spirits, the profitable manufacture of commercial alcohol requires much skill and the most improved distilling apparatus; and, except possibly for local sales and uses, alcohol produced at small distilleries could hardly compete with that produced at larger, better equipped, and more centrally located plants. Even for local uses little if any demand can be expected (unless for manufacturing purposes) until proper appliances for its use have been placed on the market.

While the quantity of industrial alcohol so far produced and used has evidently fallen far short of the expectation of those instrumental in having the denatured alcohol laws passed, it is, nevertheless, a subject of congratulation that few, if any, frauds have been committed or attempted in connection with the manufacture or use of this class of spirits.

EXPLANATORY CIRCULARS ON DENATURED ALCOHOL LAW AND REGULATIONS.

In order to meet what appeared to be a very general and widespread demand for instruction regarding the intent and purposes of the denatured alcohol law and for elucidation of the regulations concerning the withdrawal of alcohol free of tax, I have during the past few

months prepared and issued, at stated intervals, explanatory circulars addressed to collectors and revenue agents and directing these officials to instruct taxpayers and inquirers generally regarding the law and the regulations promulgated thereunder.

The first of these circulars, of date September 26, was devoted to the subject of industrial distilleries, and described the methods which could be employed by the farmer or fruit grower who might desire to utilize the products of his labors in the manufacture of alcohol for domestic uses. This circular called particular attention to the fact that small distilleries which had been rendered useless for producing alcohol for beverage purposes by reason of local prohibitory laws might be profitably employed in the distillation of spirits for denaturation. The second circular, of date October 12, was designed to dispel the impression that there existed many governmental restrictions which interfered with the handling of denatured alcohol by wholesale and retail dealers. The regulations in this respect were explained and their simplicity fully illustrated. The succeeding circular, dated October 19, instructed internal-revenue officers in the field, as opportunity offered, to fully advise those persons in whose business alcohol could be used, and called attention in detail to the rights and privileges of manufacturers who use denatured alcohol.

DENATURED ALCOHOL EMPLOYEES.

The officials appointed, and who are now in the service, for the purpose of enforcing the provisions of the denatured-alcohol law are: Four revenue agents, salary $6 per day and expenses; 17 inspectors, salary $5 per day and expenses; 4 inspectors, salary $4 per day and expenses; 2 inspectors, salary $3 per day and expenses; 2 deputy collectors, salary $1,400 per annum; 2 deputy collectors, salary $1,200 per annum; 3 deputy collectors, salary $1,000 per annum; 4 deputy collectors, salary $900 per annum; 1 deputy collector, salary $720 per annum; 1 chemist, salary $3,000 per annum; 1 chemist, salary $1,200 per annum; 1 clerk, salary $1,600; 1 clerk, salary $1,400; 1 clerk, salary $1,200; 6 clerks, salary $1,100; 2 clerks, salary $900; 1 assistant messenger, salary $720. In addition to these officials, the following deputy collectors and clerks were employed for the periods set forth: One deputy collector, May 1 to May 15, 1907, at salary of $1,000 per annum; 1 deputy collector, May 27 to August 1, 1907, at salary of $1,200 per annum; 1 deputy collector, July 1 to August 20, 1907, at salary of $900 per annum; 1 clerk, August 15 to October 15, 1907, at salary of $1,500 per annum; 2 clerks, December 27, 1906, to September 15, 1907, at salary of $1,200 per annum; 2 clerks, December 27, 1906, to June 30, 1907, at salary of $1,000 per annum; and 1 assistant messenger, July 15 to September 20, 1907, at salary of $720 per annum.

Notwithstanding, as before stated, that certain general conditions have retarded rapid development of the use of denatured alcohol, there has been and is a gradual increase in the number of those who sell and those who utilize this commodity, and an increased number of applications for information as to the methods, laws, etc., incident thereto. This growth has required recent additions to the office and field force employed for supervising the withdrawal of alcohol for

denaturation, and additional appointments are required from time to time. The appropriation for the current year, however, will be sufficient to defray all of the expenses incident to this branch of the service.

SYNOPSIS OF REGULATIONS.

Distillery denaturing bonded warehouses.—Warehouses of this class are to be established on the distillery premises where the spirits to be denatured are produced, and are to be used exclusively for denaturing purposes. They are to be properly constructed and equipped with storage and mixing tanks, and are to remain in the custody of the officer whose duty it is to see that all such spirits are properly mixed with approved denaturants, to be kept securely stored in such warehouses. Alcohol of not less than 180° proof and rum of not less than 150° proof may be removed to such warehouses for denaturation at such times as the distiller may elect.

All shipping tanks or packages containing the denatured spirits are to be properly gauged and marked, and all such packages are to have affixed thereto engraved denatured alcohol stamps. The proprietor of each warehouse must execute a satisfactory bond; must keep a record of all denaturants and spirits received and of all spirits denatured and shipped from time to time. The officer in charge must also keep like records and make daily and monthly reports to the collector and to the Commissioner of Internal Revenue.

Industrial distilleries.—Distilleries producing alcohol from any substance whatever and having a daily spirits producing capacity not exceeding 100 proof gallons, are classed as *industrial* distilleries. Such distilleries are exempt from all requirements of existing laws relating to distilleries, except such as apply to the registry of stills; the filing of a descriptive notice of the premises and the business to be carried on; the giving of bond; the proper accounting of all materials received or used on the premises, and the spirits produced therefrom, and certain other requirements respecting signs, locks, etc. In lieu of a distillery bonded warehouse the proprietor of each such distillery may provide an alcohol room into which the alcohol produced may be conveyed. Where the daily spirit producing capacity does not exceed 50 proof gallons, or where an assignment of an officer is not deemed necessary, each such distillery may operate in the absence of an officer, and in such cases the keys to all locks attached to the stills, pipes, cistern, or cistern room may be intrusted to the distiller or his designated agent. All alcohol produced at these distilleries, however, must be gauged and must be denatured, or removed for shipment to a central denaturing warehouse, under the supervision of an officer to be detailed for that purpose. All denaturing materials, when approved (including approved denaturants which may be obtained by the distiller in sealed packages from other denaturers), are to be safely stored in the alcohol room and are to be duly accounted for by the distiller.

Central denaturing bonded warehouses.—Warehouses of this class may be established by any person, firm, or company, and on premises (subject to approval) other than those on which distilled spirits, wines, or liquors are manufactured, rectified, sold, or stored, or where

mash, wort, or wash is used in the manufacture of vinegar by vaporizing process, or where liquid medicinal preparations are manufactured. Such warehouses are to be constructed and operated in a manner similar to denaturing warehouses on distillery premises, and like records and returns are to be kept and rendered. The bond to be given by the proprietor of each such warehouse will be a combined transportation and warehouse bond, under which alcohol may be shipped to such warehouse from any distillery free of tax. Alcohol, when denatured and properly gauged or weighed, may be shipped from such warehouses to manufacturers, dealers, or consumers in packages, tanks, or tank cars, as in the case of shipment from distillery denaturing warehouses.

Tanks, tank cars, and pipe lines.—Alcohol intended for denaturation may be transferred directly from distillery cisterns, by pipes, to storage or mixing tanks in the denaturing warehouse, or to storage tanks in the distillery bonded warehouse, and from such storage tanks to tanks in the denaturing warehouse, or to tanks or tank cars for shipment to central denaturing warehouses. Denatured alcohol may also be removed from distillery denaturing warehouses or central denaturing warehouses for shipment, in tanks or tank cars, to manufacturers, dealers, or consumers.

Alcohol, before or after denaturation, so removed must be first weighed; all tanks or tank cars containing such alcohol must be properly marked, sealed, or locked.

Dealers in and consumers using completely denatured alcohol.—Dealers who sell denatured alcohol in quantities of 5 gallons or more at one time are classed as *wholesale* dealers, and those selling in quantities of less than 5 gallons are classed as *retail* dealers. Dealers and consumers purchasing denatured alcohol in other than stamped packages, and in quantities exceeding 5 gallons, must obtain from the collector of the district a permit; and wholesale dealers must keep the prescribed record of all alcohol received and disposed of by them. The storage or sale of denatured alcohol on premises where distilled spirits, wines, liquors, or liquid medicinal preparations are kept or stored, is prohibited, except in the case of druggists and grocers who, after careful inquiry made, are found to be entitled to the full confidence of the Department, and who sell, only as an incident to their business, wines or liquors which are not drunk on the premises.

Denatured alcohol intended solely as fuel, light, or power, or for other domestic purposes may also be stored on the same premises with other distilled spirits, wines, or liquors if kept in a room separate from that in which such other spirits, wines, or liquors are stored, and in tanks securely locked where the quantity so held exceeds 5 gallons. But under no circumstances will denatured alcohol be permitted on premises where distilled spirits, wines, or liquors are produced, rectified, or compounded, or where vinegar is manufactured by vaporizing process from any mash, wort, or wash.

Wholesale dealers may receive denatured alcohol in stamped packages, tanks, or tank cars. They may also store such alcohol in registered tanks, and, if so authorized by the permit granted, they may deliver such alcohol from delivery tanks of the prescribed size and construction to other dealers or to consumers.

Such deliveries will be evidenced by delivery tickets, to be signed in duplicate by the dealer and the purchaser, one copy of which will

be furnished to the collector of the district. Other sales in wholesale lots by denaturers or dealers must likewise be evidenced by memorandum slips furnished for that purpose.

Wholesale dealers may also cask denatured alcohol received in tanks or tank cars and also recask such alcohol in stamped packages. All packages so used by dealers must be properly marked and numbered and have affixed thereto stamps, to be obtained for the purpose from the collector of the district. Retail dealers must affix to each package or container of alcohol sold by them a label on which is printed (red on white) in legible letters the words "*Denatured alcohol.*" But no record or return is required of such dealers, either as to alcohol purchased or sold by them.

Manufacturers using denatured alcohol.—Manufacturers using specially denatured alcohol and manufacturers using completely denatured alcohol in quantities of 50 gallons or more during any one calendar month must file with the collector of the district an application describing the premises where the alcohol is to be stored and used and the purposes for which it is to be used. Locked storage rooms or tanks must be provided for the safe storage of such alcohol. If, on examination, the premises and uses described in the application are found to be satisfactory permit will be granted. Manufacturers using specially denatured alcohol, and manufacturers using completely denatured alcohol which is intended to be recovered for reuse, must also file a satisfactory bond, and must keep the prescribed records showing the quantity of alcohol received, used, recovered, restored, and redenatured, or sent to a restoring plant for redenaturation.

Sworn transcripts of these records will be made monthly and will be verified by the visiting officer.

Alcohol recovered, restored, and redenatured on manufacturer's premises.—Where the alcohol used for manufacturing purposes is to be recovered and redenatured for reuse, the stills and other apparatus and method to be used for this purpose must be described in the manufacturer's application, as also the estimated quantity of alcohol to be recovered and reused during the year. All stills so used must be duly registered and must be used for no other purpose.

Such stills must be kept securely locked in the absence of an officer, except where an officer can not be assigned at the appointed time, in which case the collector, if satisfied that the alcohol recovered and restored will be duly accounted for, may deliver the keys to the manufacturer and permit the use of such stills in the absence of the officer during the time to be specified in such permit.

Manufacturers using denatured alcohol and recovering the same in its original denatured state, or practically so, will also be permitted to recover the same in the absence of an officer if the alcohol is stored, used, and recovered for reuse in locked or sealed tanks, stills, vessels, or other receptacles connected by continuous closed pipes. The alcohol so recovered will also be subject to inspection by the visiting officer, and unless found, on test, to be properly denatured, the necessary quantity of approved denaturants must be added under his supervision.

Central restoring and redenaturing plants.—Centrally-located plants for restoring and redenaturing alcohol recovered by manufacturers

may be located at such places as the Commissioner of Internal Revenue may deem necessary. Each such plant must be provided with a warehouse, similar in construction to a distillery bonded warehouse, for the storage of such recovered alcohol received on the premises. A separate apartment or building, similar to denaturing bonded warehouses heretofore described, must be provided for denaturing purposes. Application for the establishment of such restoring and redenaturing plants must be made on the prescribed form, and the proprietor of each such plant must execute a satisfactory bond. The restoring and redenaturing of alcohol will be done under the supervision of an officer assigned for that purpose, and a record will be kept by both the proprietor and such officer of all recovered alcohol received, restored, redenatured, and returned to the manufacturer from whom received.

Duties of officers.—It is the duty of all officers assigned to denaturing warehouses to see that all alcohol and denaturants received are properly stored, used, and accounted for; that the alcohol so received is properly denatured; that all packages and tanks containing the same are properly marked, branded, etc., and that all requirements of the regulations respecting the denaturation of spirits are properly complied with. Revenue agents, division deputy collectors, and inspectors must make frequent and irregular visits to the premises of denaturers, dealers, and manufacturers and other premises where denatured alcohol in any considerable quantity is stored or used, and they will report any fraud or irregularity discovered by them in connection with the manufacture, sale, or use of this article. Such examination, however, must be made in such a manner as not to unnecessarily interfere with the business of such persons. But it will be the duty of every person engaged in such business to afford all necessary facilities to enable officers to make the required inspection.

NEW LEGISLATION.

Attention has heretofore been directed to the large cost to the Government of gauging spirits at rectifying houses and the furnishing of stamps by the Government for rectified spirits and wholesale liquor dealers' packages. The gauging is done at governmental expense and the stamps are furnished free of cost to rectifiers and wholesale liquor dealers. The annual expenditures on these two accounts amount, at the least, to $500,000. This office recommended last year the enactment of legislation under which a charge of 20 cents per stamp be made for each stamp issued to rectifiers or wholesale liquor dealers for use upon packages prepared and sent out by them. It is believed that if this recommendation be enacted into law a revenue of some $750,000 would be derived thereunder, and in this way the total cost to the Government of this work would be met, with a small surplus resulting. I again call attention to this subject and repeat the recommendation of last year.

ILLICIT DISTILLING.

Reports received from revenue agents in charge of divisions indicate that illicit distilling is on the decrease throughout the country generally. There appears to be cooperation between the marshals and

their deputies with the revenue officers in the suppression of illicit distilling, and assistance has been rendered by the district attorneys and the United States commissioners.

There is very little illicit distilling on the Pacific coast.

The natives of the Hawaiian Islands make a spirituous drink by distillation of the ti root, but as the Hawaiian Islands are well policed by United States officers illegal distillation is on the decrease and will eventually be stamped out.

The Esquimaux in Alaska are said to make a distilled spirits called "hootch" in small quantities for immediate consumption. This is difficult to control on account of the impossibility of policing Alaska.

RECEIPTS FOR FIRST THREE MONTHS, CURRENT FISCAL YEAR.

COST OF COLLECTION.

The cost of collection for the fiscal year, distributed among the different items of appropriation, was approximately as follows:

Salaries and expenses of collectors of internal revenue, 1907	$1,952,608.06
Miscellaneous expenses, internal-revenue service, 1907	75,761.97
Salaries and expenses of agents and subordinate officers of internal revenue, 1907	2,357,822.47
Paper for internal-revenue stamps, 1907	72,621.52
Punishment for violation of internal-revenue laws, 1907	97,339.05
Salaries, Office Commissioner of Internal Revenue, 1907	319,592.59
Total amount incurred	4,875,745.66

Expenditures from appropriation "Withdrawal of denaturalized alcohol."—The expenditures from the appropriation for "Withdrawal of denaturalized alcohol" were as follows:

Salaries and expenses of inspectors	$15,668.53
Salaries of nine deputy collectors	1,986.23
Salaries of fourteen storekeepers [a]	5,672.00
Fees and expenses of four gaugers [b]	2,171.00
Salaries of office force	9,308.04
Office traveling expenses	1,621.05
Laboratory supplies	5,790.67
Locks	406.63
Paper for denaturalized alcohol stamps	409.61
Gauging instruments	233.00
Total amount expended	43,266.76

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1909, as follows:

Office of Commissioner of Internal Revenue: For salaries of officers, clerks, and subordinate officers	$328,380.00
Salaries and expenses of collectors of internal revenue: For salaries and expenses of collectors of internal revenue, and deputy collectors and surveyors, and clerks and messengers and janitors in internal-revenue offices	2,075,000.00
Salaries and expenses of agents and subordinate officers of internal revenue: For salaries and expenses of 40 revenue agents provided for by law, and fees and expenses of gaugers, salaries and expenses of storekeepers and storekeeper-gaugers, and for miscellaneous expenses	2,500,000.00
Miscellaneous expenses, Internal-Revenue Service: For rent of offices outside of the District of Columbia, telephone service, and other miscellaneous expenses incident to the collection of internal revenue	120,000.00
Withdrawal of denaturalized alcohol, acts of June 7, 1906, and March 2, 1907	250,000.00
Paper for internal-revenue stamps: For paper for internal-revenue stamps, including freight	80,000.00
Punishment for violation of internal-revenue laws: For detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws, or conniving at the same, including payments for information and detection of such violations	125,000.00
Total	5,478,380.00
Salaries, Office of Commissioner of Internal Revenue (reimbursable): For salaries of two stamp agents and one counter	3,400.00

[a] Where alcohol was produced at a distillery and only a portion of the product was denatured and the distillery was of that class where a storekeeper was assigned to perform all the work in connection with the entry and withdrawal of alcohol and denaturing the same, payment of salary and expenses was made from the appropriation for "Salaries and expenses of agents and subordinate officers of internal revenue."

[b] Where there was not a sufficient amount of alcohol denatured at one distillery to employ the entire time of one gauger in such work, the compensation and expenses of such gauger were paid from the appropriation for "Salaries and expenses of agents and subordinate officers of internal revenue."

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1909, the sum of $328,380 as salaries for the following officers, clerks, and employees in this Bureau:

1 Commissioner of Internal Revenue	$6,000.00
1 Deputy Commissioner	4,000.00
1 Deputy Commissioner	3,600.00
1 chemist	2,500.00
1 first assistant chemist	1,860.00
1 second assistant chemist	1,620.00
1 third assistant chemist	1,500.00
1 fourth assistant chemist	1,200.00
2 heads of divisions, at $2,500 each	5,000.00
6 heads of divisions, at $2,250 each	13,500.00
1 superintendent of stamp vault	2,000.00
1 private secretary	1,800.00
29 clerks of class 4	52,200.00
24 clerks of class 3	38,400.00
36 clerks of class 2	50,400.00
36 clerks of class 1	43,200.00
Additional to one clerk as disbursing clerk	200.00
31 clerks, at $1,000 each	31,000.00
44 clerks, at $900 each	39,600.00
4 messengers, at $840 each	3,360.00
17 assistant messengers, at $720 each	12,240.00
20 laborers, at $660 each	13,200.00
259	328,380.00

I also recommend the appropriation of the sum of $3,400 as salaries for two stamp agents, one at $1,600, one at $900, and one counter at $900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualifications that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
$25,000 or less	$2,000	$375,001 to $425,000	$3,375
$25,001 to $37,500	2,125	$425,001 to $475,000	3,500
$37,501 to $50,000	2,250	$475,001 to $550,000	3,625
$50,001 to $75,000	2,375	$550,001 to $625,000	3,750
$75,001 to $100,000	2,500	$625,001 to $700,000	3,875
$100,001 to $125,000	2,625	$700,001 to $775,000	4,000
$125,001 to $175,000	2,750	$775,001 to $850,000	4,125
$175,001 to $225,000	2,875	$850,001 to $925,000	4,250
$225,001 to $275,000	3,000	$925,001 to $1,000,000	4,375
$275,001 to $325,000	3,125	$1,000,001 and upward	4,500
$325,001 to $375,000	3,250		

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed $4,500. (See secs. 3148 and 3314, Rev. Stats.)

OFFICIAL FORCE.

At the close of the fiscal year ended June 30, 1907, 258 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was $319,592.59, which does not include office force paid from the appropriation "Withdrawal of denaturalized alcohol," from which was paid $9,308.04, covering salaries of 12 employees.

The force connected with this Bureau during the fiscal year which ended June 30, 1907, in the various districts throughout the United States, as reorganized under the Executive order of May 21, 1887, was 66 collectors, who received per annum salaries and commissions as follows:

CHEMISTRY DIVISION.

The following table shows the number and character of the samples received and examined in the laboratory at Washington during the past fiscal year:

Oleomargarine	571
Butter	382
Oils	36
Fortified wines	45
Distilled liquors	309
Malt liquors	168
Fermented liquors (other than malt)	53
Miscellaneous beverages	98
Wines	60
Medicinal compounds	108
Mixed flour	4
Filled cheese	2
Ink	46
Sealing wax	13
Mucilage	14
Typewriter ribbons	4
Miscellaneous	37
Total	1,950
Increase from last fiscal year	749

During the present year the work was so systematized that all of the samples, with a few exceptions, were promptly analyzed, and reports made in each case, so that the results could be of the greatest possible use to the revenue officers in the field. The exceptions noted were not analyzed, because they were either duplicates or submitted by private parties.

During the first three months of the current (fiscal) year the number of samples received and analyzed has already amounted to 1,200. At this rate the work of the laboratory will probably be tripled for the ensuing fiscal year.

CLAIMS FOR REWARD.

Claims for reward for information of violation of the internal-revenue laws, made under the provisions of circular No. 99, revised, and of the circular of March 10, 1875, were presented and disposed of as follows:

Claims pending July 1, 1906	3
Claims presented during the fiscal year ended June 30, 1907	8
Total	11
Claims disposed of during the fiscal year ended June 30, 1906	9
Number of claims pending July 1, 1907	2

These claims are payable from the annual appropriation for "Punishment for violation of internal-revenue laws," the greater portion of which fund is expended through revenue agents.

REAL ESTATE ACQUIRED BY THE UNITED STATES UNDER THE INTERNAL-REVENUE LAWS.

The Commissioner of Internal Revenue has charge of all real estate acquired under the provisions of the internal-revenue laws, and is authorized, with the approval of the Secretary of the Treasury, to sell at public vendue the interest of the United States in such realty.

During the last fiscal year the United States acquired title to real estate in 9 cases—in 2 cases by sales by collectors under distraint proceedings, and in 7 cases by sales by the marshal under execution.

Sales under distraint to private purchasers were made by collectors of internal revenue in 5 cases during the last fiscal year.

Nine real estate cases were disposed of during the year.

One suit in ejectment is pending in the northern district of Alabama, and three are pending in the western district of North Carolina.

Two suits in equity to enforce liens were pending in the western district of North Carolina July 1, 1906. In one, a decree was rendered in favor of the United States. The other is still pending, and a similar action instituted during the year is also pending in that district.

The following is a statement of the tracts or lots of land acquired under the internal-revenue laws and owned by the United States on the 30th day of June, 1907, aggregating about 2,500 acres.

District.	Number of tracts or parcels of land.

PROPOSED AMENDMENTS TO THE LAW.

OLEOMARGARINE.

In view of the decisions of the court to the effect that the oleomargarine law is a complete system in itself and that certain provisions of the internal revenue law do not apply because not specifically mentioned, the following amendment to the act of August 2, 1886, as amended by the act of May 9, 1902, is recommended:

All the administrative provisions of the internal revenue law are hereby made applicable to the act of August 2, 1886, entitled "An act defining butter, also imposing a tax upon and regulating the manufacture, sale, importation and exportation of oleomargarine" and the act of May 9, 1902, and other amendatory acts.

FILLED CHEESE.

I recommend that the filled cheese act of June 6, 1896, entitled An act defining cheese, also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of "filled cheese," be amended in the same manner.

BONDING GOODS SEIZED.

Section 3459, Revised Statutes, should be amended so as to make it applicable to seizures made under any provision of the internal-revenue law, subject to restriction as to distilleries in section 3331, Revised Statutes.

WHOLESALE AND RETAIL DEALERS IN MALT LIQUORS.

The definition of a wholesale and retail dealer in malt liquors should be amended so as to make it conform to that of brewers in respect to sale of liquors made from a substitute for malt. I suggest the following amendment, viz:

Amend the fifth subdivision of section 3244, Revised Statutes, to read as follows:

"Retail dealers in malt liquors shall pay twenty dollars. Every person who sells, or offers for sale, fermented liquor manufacutred wholly or in part from malt or from any substitute therefor, in less quantities than five gallons, at one time, but who does not deal in spirituous liquors, shall be regarded as a retail dealer in malt liquors.

"Wholesale dealers in malt liquors shall pay fifty dollars. Every person who sells, or offers for sale, fermented liquor manufactured wholly or in part from malt, or from any substitute therefor, in quantities of not less than five gallons at one time, and who does not deal in spirituous liquors at wholesale, shall be regarded as a wholesale dealer in malt liquors," etc.

The wording given follows the definition of a brewer in the first subdivision of said section.

TAX ON BAY RUM FROM PORTO RICO.

I recommend the passage of an act to impose a tax on bay rum brought from Porto Rico into the United States similar to the bill which was introduced in the last Congress (H. R. 25122).

That act provided that a tax of $1.10 per gallon shall be collected on each gallon of bay rum coming from Porto Rico by the collector of internal revenue of the district in which the port is located.

The purpose was to place bay rum imported from Porto Rico, and the product of that island, on the same basis as to the payment of internal-revenue taxes as bay rum manufactured in the United States.

This office has been collecting a tax of $1.10 per gallon on bay rum from Porto Rico, but decisions have been made in the courts of the eastern and southern districts of New York to the effect that the imposition of such tax was unauthorized.

Final decision of the higher court has not yet been had.

MODIFICATION OF THE CRIMINAL STATUTES RELATIVE TO DISTILLED SPIRITS, FERMENTED LIQUORS, TOBACCO, CIGARS, AND OLEOMARGARINE.

I recommend that the sections of the internal-revenue law which provide punishment for various offenses by fine and imprisonment be amended so that the court can impose a fine *or* imprisonment at its discretion, and not be obliged to impose a fine *and* imprisonment, as is the case at present.

The object I have in view is to give the court an opportunity to affix a punishment by fine alone when it is of the opinion that under the circumstances a fine would answer the purpose.

It sometimes happens that a young man of previous good character is charged with violation of the internal-revenue law, and if sentence of imprisonment is imposed a stigma attaches which may affect his whole future life, when if only a fine he will have a better chance to begin an honest career and establish a character as a law-abiding citizen under the good influences of his family and friends.

A list of sections which would be affected by such an amendment is submitted herewith:

MISCELLANEOUS DIVISION.

OLEOMARGARINE, ADULTERATED BUTTER, PROCESS OR RENOVATED BUTTER, FILLED CHEESE, AND MIXED FLOUR.

The following statements show operations under the act of August 2, 1886, as amended by the act of May 9, 1902, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine, adulterated butter, and process or renovated butter.

There was an increase of 2,869,543 pounds in the production of oleomargarine, taxable at the rate of 10 cents per pound, during the fiscal year ended June 30, 1907, and an increase of 13,052,332 pounds in the production of oleomargarine, taxable at the rate of one-fourth cent per pound, during the same period, making a total increase of 15,921,875 pounds.

During the fiscal year ended June 30, 1907, there was an increase of 9,415,713 pounds in the total production of renovated butter compared with the production for the fiscal year ended June 30, 1906.

There were no qualified manufacturers of adulterated butter reported during that period, the quantity of this product that was tax paid being that which was discovered upon the market containing moisture in excess of the limit fixed by the regulations and upon which a tax of 10 cents per pound was required to be paid.

Transactions in filled cheese, which were of small volume, will be found by reference to the table under that heading.

Operations in mixed flour showed an increase in the total production and withdrawal for the fiscal year ended June 30, 1907, compared with previous fiscal years, as will be noted by reference to the subheading and table relating to that product.

SUMMARY OF OPERATIONS IN THE PRODUCT TAXED AT RATE OF 10 CENTS PER POUND AT OLEOMARGARINE FACTORIES DURING THE FISCAL YEAR ENDED JUNE 30, 1907.

FILLED CHEESE.

The following statements show the operations under the act of June 6, 1896, defining cheese, imposing a tax upon and regulating the manufacture, sale, importation, and exportation of filled cheese. Special taxes are imposed as follows:

Manufacturers are required to pay $400 per annum for each and every factory, wholesale dealers $250 per annum and retail dealers $12 per annum for each and every establishment.

A tax of 1 cent per pound is imposed on filled cheese manufactured and removed, whether for domestic consumption or for exportation, there being no provision in the law for the withdrawal of this product free of tax for export.

The quantity of filled cheese produced and withdrawn, tax paid, for export monthly, from July 1, 1906, to June 30, 1907, none being removed for consumption or use in this country, is as follows:

[a] This quantity contains 1 barrel, 41 half barrels, 9 eighth barrels, and 3,152 pounds, which was destroyed.

It will be noted from the above table that the month of the greatest production was October, 1906, during which 1,442,195 pounds of mixed flour, packed in 94 barrels, 16,200 half barrels, 1,822 quarter barrels, and 5,831 eighth barrels, were produced, while the largest withdrawal for a simliar period occurred during that month, when 1,462,082 pounds, packed in 94 barrels, 16,559 half barrels, 1,758 quarter barrels, and 5,630 eighth barrels, were withdrawn. The average monthly production was 517,624 pounds, and the average monthly withdrawal 517,138 pounds, in both cases being an increase over the corresponding averages for the previous fiscal year. The total production and withdrawals for the fiscal year ended June 30, 1907, show an increase of 987,245 pounds and 982,601 pounds, respectively, over the corresponding figures for the fiscal year ended June 30, 1906.

INTERNAL-REVENUE STAMP PAPER.

Advertisements were published inviting sealed proposals to furnish distinctive paper on which to print internal-revenue stamps for the fiscal year ending June 30, 1908, and three bids were submitted. The proposals were opened May 1, 1907, by a committee appointed by the Secretary of the Treasury. The contract was awarded to the New York and Pennsylvania Company, the lowest bidder, at 4.6 cents per pound. The previous contract price was 3.95 cents per pound. During the fiscal year ending June 30, 1907, the Bureau ordered 1,838,397 pounds of this paper, at a total cost of $72,616.68.

PRODUCTION OF STAMPS.

All of the stamps issued by this Bureau are engraved and printed by the Bureau of Engraving and Printing, with the exception of tobacco stamps of the denomination of 1 and 1¾ ounces imprinted on tin-foil wrappers, which are printed by the John J. Crooke Company, of Chicago, Ill., and the Conley Foil Company, of New York City. The printing of these stamps is performed under contracts and without cost to the Government, the contractors receiving their remuneration from the purchasers of the stamps and reimbursing the Government for the salaries of agents and counters necessary to properly supervise the work.

RESTAMPING.

One hundred and thirty-nine applications for restamping tax paid articles, under section 3315, Revised Statutes, were considered and disposed of during the year.

Stamps of various kinds and denominations—fractional books from outgoing officials and stamps for which there was no use—to the value of $19,186,074.56 were returned by collectors and credited in their accounts.

ANNUAL PRODUCTION OF LEAF TOBACCO.

The following table will show the annual production of leaf tobacco in the United States for three successive years, January 1, 1903, to December 31, 1905, inclusive.

The production for 1906 can not be ascertained until returns have been received for 1907:

	1903.	1904.	1905.
	Pounds.	*Pounds.*	*Pounds.*
Leaf used in manufacture of chewing and smoking tobacco and snuff	307,491,554	314,524,931	325,370,642

Total annual production	771,849,498	720,804,449	779,384,945

There was an increase of 23,252,802 pounds in the quantity of leaf tobacco used in the manufacture of taxable tobacco products, and an increase of 43,805,274 and a decrease of 7,838,277 pounds, respectively, in the quantity of domestic leaf exported and foreign leaf imported, and an increase of 58,580,496 pounds in the quantity of domestic leaf produced as compared with the previous year.

The duties and taxes collected from tobacco during the fiscal year ended June 30, 1907, amounted to $77,936,107.10.

The duty collected upon imported leaf tobacco unmanufactured amounted to $22,307,624.38, and that collected upon imported tobacco manufactures entered for consumption amounted to $3,817,413.03, while the internal-revenue tax collected, as previously stated, amounted to $51,811,069.69.

The above statement of receipts does not include duties collected on tobacco products under act approved March 8, 1902, entitled "An act temporarily to provide revenue for the Philippine Islands, and for other purposes."

Section 4 of that act provides:

> That all the duties and taxes collected in the United States upon articles coming from the Philippine Archipelago * * * shall not be covered into the general fund of the Treasury of the United States, but shall be held as a separate fund and paid into the treasury of the Philippine Islands to be used and expended for the government and benefit of said islands.

MANUFACTURE OF TOBACCO PRODUCTS FOR THE CALENDAR YEAR 1906.

The tables, numbered from 1 to 4, inclusive, closing this chapter, localize the manufacture of cigars, cigarettes, tobacco, and snuff among the different States and districts, and show the number of persons or firms engaged in each branch of manufacturing, the quantity of different kinds of material used, and the quantity and kinds of products manufactured. These tables are compiled for the calendar year ended December 31, 1906, instead of the fiscal year ended June 30, 1907, which fact will account for any apparent discrepancies between this and the previous part of the report relating to tobacco production.

Tables Nos. 1 and 2 relate to the manufacture of cigars and cigarettes.

The total number of cigar manufacturers for whom accounts were rendered for the calendar year 1906 was 26,348, which includes 536 manufacturers of cigarettes.

The total number of cigars made weighing more than 3 pounds per thousand was 7,147,548,312, an increase of 399,679,035 compared with the production of 1905.

The total number of cigars made weighing not more than 3 pounds per thousand was 989,751,253, an increase of 186,109,637 cigars, as compared with the production for the previous year.

The total number of cigarettes made was 4,511,997,137, showing an increase of 838,269,726 over the previous year.

The average quantity of unstemmed tobacco used in making 1,000 cigars weighing more than 3 pounds per thousand was 19.07 pounds; in making 1,000 cigars weighing not more than 3 pounds per thousand, 3.98 pounds.

Manufacturers used 16,011,385 pounds of unstemmed leaf, or its equivalent in stemmed leaf, scraps, and cuttings, in making 4,501,254,783 cigarettes, tax paid as weighing not more than 3 pounds per thousand, or an average use of 3.56 pounds per thousand, and used 99,550 pounds of tobacco material in making 10,742,354 large cigarettes, or an average of 9.27 pounds of material for each 1,000 cigarettes manufactured.

Tables Nos. 3 and 4, respectively, relate to tobacco and snuff.

There was no change in the number of tobacco and snuff factories operated during last year as compared with the previous year.

There was an increase of 6,513,222 pounds of unstemmed leaf tobacco, and 7,780,455 pounds of stemmed leaf; a decrease of 2,688,676 pounds of scraps and cuttings, 467,878 pounds of tobacco in process, and 759,290 pounds of stems; an increase of 2,920,918 pounds licorice,

4,674,683 pounds of sugar and 1,500,001 pounds of other materials used in manufacturing as compared with the previous year.

There was a total increase of 19,473,435 pounds in the quantity of materials of all kinds used in the manufacture of tobacco and snuff as compared with the previous year.

There was an increase of 8,263,146 pounds of plug, 1,532,985 pounds of twist, 1,058,161 pounds of fine-cut chewing, 10,455,109 pounds smoking, and 2,444,207 pounds of snuff manufactured as compared with the previous year.

The total production of tobacco, not including snuff, by States producing not less than 6,000,000 pounds each per annum, as follows:

Missouri	72,048,808	Illinois	19,239,069
North Carolina	63,440,723	Michigan	18,357,748
Kentucky	52,342,943	Maryland	14,929,657
Ohio	32,971,012	New York	12,377,287
Virginia	28,625,393	Wisconsin	6,484,488
New Jersey	25,715,411		

Snuff was manufactured in 27 districts, the total production amounting to 26,115,285 pounds, an increase of 2,444,207 pounds over the previous year.

The district of Maryland, which includes the State of Delaware, produced 11,811,365 pounds, the product in the latter State being snuff flour, which is transferred as snuff flour in process to the first district of Pennsylvania, where its manufacture is completed and it is tax paid; New Jersey produced 7,240,745 pounds, all manufactured in the fifth district; Tennessee produced 4,709,179 pounds, all in the fifth district; Illinois produced 1,886,482 pounds.

OPIUM.

The tariff act of October 1, 1890, section 36 (26 Stat. L., 567), imposes an internal-revenue tax of $10 per pound upon all opium manufactured in the United States for smoking purposes, and provides that no person shall engage in such manufacture who is not a citizen of the United States and who has not given the bond required by the Commissioner of Internal Revenue. This act also imposed a duty of $12 per pound on the imported article, but admitted the importation of crude or unmanufactured opium free of duty.

The tariff act of August 28, 1894, reduced the duty on the imported article to $6 per pound, and this rate was reimposed by the tariff act of July 24, 1897, which imposes a duty of $1 per pound on opium, crude or unmanufactured.

The reduction of the duty on the imported article and the imposition of a duty on crude or unmanufactured opium has discouraged the manufacture of smoking opium in the United States.
